Glossary

This glossary is a concise guide to the terminology and definitions related to animal health surveillance, aiming to facilitate communication between those commissioning, designing, implementing and contributing to surveillance activities to provide a common understanding of these different surveillance activities. The glossary includes established definitions that have been published elsewhere as well as suggestions for additional terms or refinements where gaps or difficulties in understanding were identified by the RISKSUR consortium. Unless noted otherwise, all definitions are derived from the ICAHS [Animal Health Surveillance Terminology Final Report](#) (version 1.2). If you have additional terms to add or propose a revision to one of the definitions listed, please [email us](#). Your suggestions will be incorporated into the glossary following a peer-review. Final recommendations regarding surveillance terminology will be made available online at the end of the project. We welcome your input!

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

A

- Acceptability and engagement
- Active surveillance
- Assessment
- Associated legislation and regulations

B

- Benefit
- Bias

C

- Case definition
- Communication and dissemination
- Cost
